KEY BUSINESS INSIGHTS

🔵 1. Revenue Concentration

North region is the top revenue contributor (~47K), followed by South (~43K), while East is significantly underperforming (~18K).

- Revenue is **heavily concentrated**
- East region needs strategic attention

🔵 2. Growth vs Revenue Mismatch

North shows the highest YoY Growth (~25.87%) along with highest revenue, indicating strong momentum in an already dominant market.

- Not just big → also growing fastest
- High ROI region

🔵 3. Underperformance Identification

East region has both low revenue and relatively lower growth (~8.24%), making it the weakest performing region overall.

- Investigate:
  - Sales strategy
  - Market penetration
  - Product fit

🔵 4. Category Dominance

Furniture is the highest revenue-generating category (~65K), followed by Electronics (~52K), while Clothing lags significantly (~25K).

- Business is **dependent on Furniture**
- Clothing is under-optimized

🔵 5. Product-Level Opportunity

Electronics shows strong growth contribution in North (32%) despite moderate revenue, indicating high future potential.

- Electronics = **growth driver**
- Furniture = **revenue stabilizer**

🔵 6. Customer Segment Insight

Corporate segment contributes the highest share (~43%), followed by Consumer (~29%) and Home Office (~27%).

- Business is **B2B-heavy**
- Corporate customers drive revenue

🔵 7. Target vs Actual Gap

Across all regions, actual sales consistently fall below target, with the gap widening in lower-performing regions like East.

- Targets may be:
  - Too aggressive
  - Or execution is weak

🔵 8. Sales Volatility

Sales trend shows high volatility with sharp spikes and drops, indicating inconsistent demand patterns.

- No stable sales cycle
- Possible causes:
  - Seasonal demand
  - Irregular transactions

🔵 9. Forecast Insight (VERY IMPORTANT)

Forecast indicates moderate upward growth but within a wide confidence interval, suggesting uncertainty in future demand.

- Growth expected
- But **risk is high**

🔵 10. Operational Insight

Regions with higher sales also show higher transaction volumes (North: 76 units), indicating strong demand consistency.

- Growth is backed by volume
- Not just pricing
